Project Location: 35 miles SW of Bakersfield, one mile SW of the intersection of St Rte 33 and Shale Road in Kern County, California

Project Description:

Conversion to combined-cycle operations to add 265 MW of nominal generating capacity to the existing 320 MW simple-cycle power plant. New facilities include two duct-fired heat recovery steam generators, one 265 MW steam turbine generator, an evaporative condenser cooling tower system, an anhydrous ammonia SCR system, a 15.5 mile water supply pipeline, a 4.8 acre expansion of the existing power site, and four additional deep injection wells for wastewater disposal located approximately 1.5 miles southeast of the existing power plant.

On November 19, 2001 the California Energy Commission approved the above-described project pursuant to a regulatory program certified by the California Secretary of Resources under Section 21080.5 of the California Public Resources Code.
